DISCLAIMER:
 This map depicts the freshwater distribution of a fish and wildlife species in Water Resource Inventory Area 17. The depicted upper limits of freshwater distribution are based primarily on the collective personal knowledge of the participants in the ongoing workshops with additional consultation of other persons. Details on flow capacity can be found in the report associated with this map. The information depicted on this map is current as of August 2002. This map represents a depiction of distribution and may not represent or overstate the actual distribution. All accessible freshwater bodies should be considered to have the same species distribution as the watershed. This map may inaccurately depict the location of water bodies. For example, some water bodies may be incorrectly located on this map, or may not be depicted on this map at all. All users of this map should seek the assistance of qualified professionals such as surveyors, hydrologists, or fishery biologists or others to ensure that both water resource management, permits, and up to date information on fish distribution and water body location.
